PROJECTS

Ski Buddies

- Fullstack app to connect skiers and snowboarders who live close to a specific resort to pair up for a few ski/snowboard adventures. Currently in progress > [Code](#)
- React with Hooks, Express, NodeJS, MySQL, React Library Testing and Jest, Material-UI, etc.

Wake up and Fly

- Fullstack app that tells a user what time to wake up to catch a flight. To use the app, one has to input the flight number and the location from where the person will leave > [Demo](#)
- React, JavaScript, Express, NodeJS, Momentjs, API's: HereMaps and Flightstats.

More projects on my portfolio and [GitHub](#).

EXPERIENCE

Geneva Business School

SEPTEMBER 2020 - PRESENT

Associate Professor - Teaching Introduction to Coding

- Decreased the dropout rate of the course by creating a course syllabi, learning activities, and quizzes that keep that students engaged
- Organizing a panel for the students where professionals share what it is like working in a tech role so that students understand the value of knowing how to code in the business world.

Criteo

JUNE 2020 - DECEMBER 2020

Software Engineer

Responsible for the technical integration and design of Criteo's online advertising products for the Middle East market.

- Code assistance, troubleshooting in JavaScript, DOM Manipulation and tags/Pixel implementation on client's websites.
- Decreased the integration time by automating the GTM pixel implementation with ready-to-use templates.

The Recurse Center

APRIL 2020 - JUNE 2020

Participant

The Recurse Center is a self-directed, community-driven educational retreat for programmers in New York City intended for people who want to get dramatically better at programming.

- Hosted a pair programming workshop.
- Build a blog using React and Gatsby and various other projects.

Softonic, Bitdefender, IBM, HP
